Our Production

What does mainly characterize **MBB Elevators**? Its lifting systems customization and adjustability. **MBB Elevators** can satisfy any demand by suggesting adequate, rational and aesthetically excellent solutions.

From the design of a lifting system to its construction, installation and maintenance, our customers can trust on a single company, efficient and flexible at the same time, at reasonable prices.

Contact us and you will realize that besides an high construction technology our company can guarantee a strong know-how, a great flexibility and a constant customer service.

Hydraulic lifting platforms and the cabins for MBB lifts or platforms are designed and built on site.

All of our cabins can be built and customized according to customer requirements.

Our cabins are fitted in all their components, inside the cabin itself, there by making it easier and faster installation in site, having definitely save money!

Manufacturers of cabins since 1985

Manufacturers of Hydraulic lifting platforms since 2010

Hydraulic lifting platforms

Ideal to move freely both inside and outside of homes spread over several floors. With the pleasant sensation in feel relieved

The installation of platform lifts for disabled MBB can be made either on the load-bearing wall, using special mounting brackets to the wall or using the metal structure, which allows you to place it in any living environment.

Possibility of installation in particularly narrow stairwells. In fact, the models SUN and MOON are designed and manufactured by adopting the logic of "tailor-made" real, using every inch of available space.

With a maximum stroke of 14 meters, the platforms can serve up to 5 floors in total safety and in compliance with the architectural features of the environment in which it is inserted. The consumption of the platforms are significantly reduced, compared to that of a normal household appliance.

Particular attention is paid to every detail and finishes, together with the wide range of options and colors available, so as to be fully configurable according to the specific needs of the customer.

Compliant with Directive
2006 / 42 / CE (Legislative Decree 17 / 2010)

- Sun Model with manual landing door and photoelectric sensors across the car door entrance
- Moon Model with automatic folding car doors and manual landing doors or with completely automatic car and landing door

Hydraulic lifting platforms is designed
and built on site.

Possible configurations:

- Load (Kg) : 250-380
- Speed (m/ sec) : 0,15
- Stops: maximum 5
- Headroom (m) : minimum 2,40 (for model SOLÉ) / 2,60 (for model LUNA)
- Travel (m) : maximum 14
- Pit (m) : 0,12 / 0,15
- Standard universal call button
- Soft start and stop technology
- Self-leveling accuracy within 20 mm
- Single phase power supply (220 / 240 V)
- Consumption: from 1.5 to 2.2 Kw
- Electric locks
- Standard plastic coated metal sheet enclosure with choice of colour from our colour chart
- Custom-made items – Sized according to the minimum or maximum cabin space
- Possibility of installing a masonry or a metal shaft structure
- Enclosed in a safety glass structure, with insulated panels and painted metal sheets
- One-panel metal landing doors coated with anti-rust paint available in three variants:
windowless, / with window, / with picture window
